

A reliable monitor
to protect against CO poisoning:

Multi-Level Carbon Monoxide (CO) Detector

- Aviation
- Home
- Auto
- Workplace
- Recreation

Minimum
18
Month
Sensor Life!*

Proprietary Carbon Monoxide Sensor

- Minimum 18 months product life
- Affords protection at broadest range of temperature and humidity
- CO specific

Multi-Level Detection

- Normal = Yellow
- Caution = Green
- Danger = Dark Blue

Biomimetic Technology

- Responds to CO in manner similar to the human body
- Rapid sensor regeneration

Unique Package

- Customer assembly not required
- One-step activation eliminated possible sensor contamination by end-user
- Sensor is protected against accidental contamination

* Once detector has been opened by end-user.

QUANTUM EYE® Multi-Level Carbon Monoxide (CO) Detector

Table 1. PPM.CO vs Time (min.) vs. Colors at 23±3°C and 50±20%RH:

PPM.CO	Normal	Caution	Danger
50	0-200	240 +	NA
100	0-20	25-55	60-90
200	0-9	10-22	23-35
400	0-3	4-9	10-15

Operating Range: 41°F to 100°F (5°C to 38°C)
25% to 90% Relative Humidity

Sensor Regeneration: Caution: 2 Hours
Danger: 6 Hours

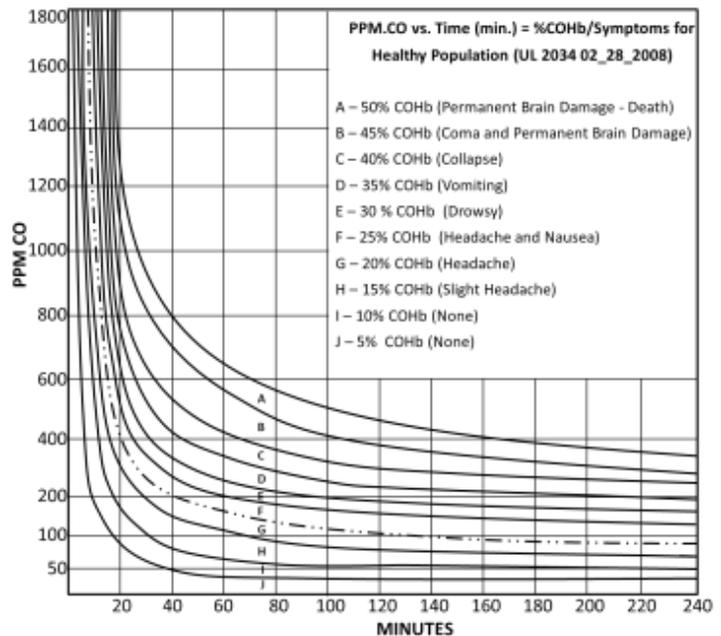

Potential Uses:

- Aviation Cockpits
- Workplace
- I.D. Badges
- Promotions

Product UPC: 0-37729-30210-8

Carbon Monoxide (CO) is an insidious and cumulative poison. It is a colorless, odorless and tasteless gas produced by the incomplete combustion of fuel

Figure 1. PPM.CO vs. Time (min.) = %COHb/Symptoms for Healthy Population (UL 2034 02_28_2008)

U.S. Patents: 5,063,164 and other patents pending
