

# ACCUSTORE

## STORAGE ROOM CONTROLLER

- Reduce waste and spoilage.
- Remove guesswork and improve product consistency.
- Remote monitoring of facilities.

The ACCUSTORE Storage Room Controller enables packing, shipping and distribution managers to precisely monitor and control the levels of CO<sub>2</sub>, O<sub>2</sub>, and C<sub>2</sub>H<sub>4</sub> (Ethylene) in produce storage facilities. With highly precise sensors and the ability to control gas levels remotely, the F-901S is transforming the postharvest industry by improving consistency, repeatability and dramatically minimizing the risk of spoilage.

**Minimize spoilage risk and improve storage consistency remotely!**

### ACCUSTORE FEATURES

- Features 0-20 ppm C<sub>2</sub>H<sub>4</sub> Sensor  
Maintain ppb Level Ethylene  
Onboard KMnO<sub>4</sub> Zero Gas scrubber
- Remote Access via Network
- Robust Alert System
- DIY Annual "Maintenance by Mail"

Control Module

Sensor Module

### ACCUSTORE CHASSIS

- Modbus Integration (TCP/IP & RS485)
- Water Resistant, Low Volume, Low Condensation Design
- Low Maintenance
- High Precision Internal Pump
- Connection to AC via External 12v Transformer
