Product Notice

TL-2055 and FT-2145 Test Lamps

Regions Affected: *Americas*

Distribution: *Internal and HA Channel Partners, Distributors, OEMs, Integrators*

To whom it may concern:

The Model TL-2055 and FT-2145 Test Lamps are designed for use in hazardous classified locations. There has been a recent component change that has affected the approvals status of each of these Test Lamps. A new explosion-proof switch has been sourced to replace the older switch that has been discontinued. The new switch meets (or exceeds) the regulatory requirements for Factory Mutual, however, it is still under evaluation with ATEX and IECEx.

In order to continue to meet current demands for TL-2055 and FT-2145 Test Lamps that do not require ATEX and/or IECEx certification, we have renumbered the products for the purpose of making them available for related shipments. The new Part Numbers are TL-2055-2 and FT-2145-2 and reflect the Factory Mutual Certification for the United States and Canada.

We have not yet received an estimated time for completion of the ATEX/IECEx certification. New Part Numbers (TL-2055-1 & FT-2145-1) will be created when the ATEX/IECEx certification is received. These new Part Numbers (TL-2055-1 & FT-2145-1) will have both the existing FM certification as well as the ATEX/IECEx certification.

I will keep you updated as new information becomes available.

If you have any questions regarding this Product Notice please feel free to contact me.
